

Main yurt crate shown as representation. Scale is not exact.

SUGGESTED TOOLS

We recommend you source and prep your tools before heading to your site. In addition, be sure to have hard hats and first aid materials on hand.

CORDLESS DRILL

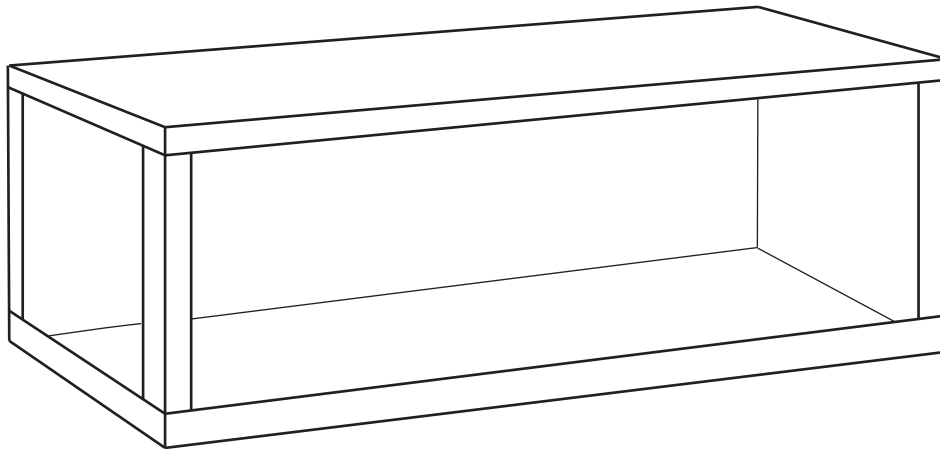

6' LADDER

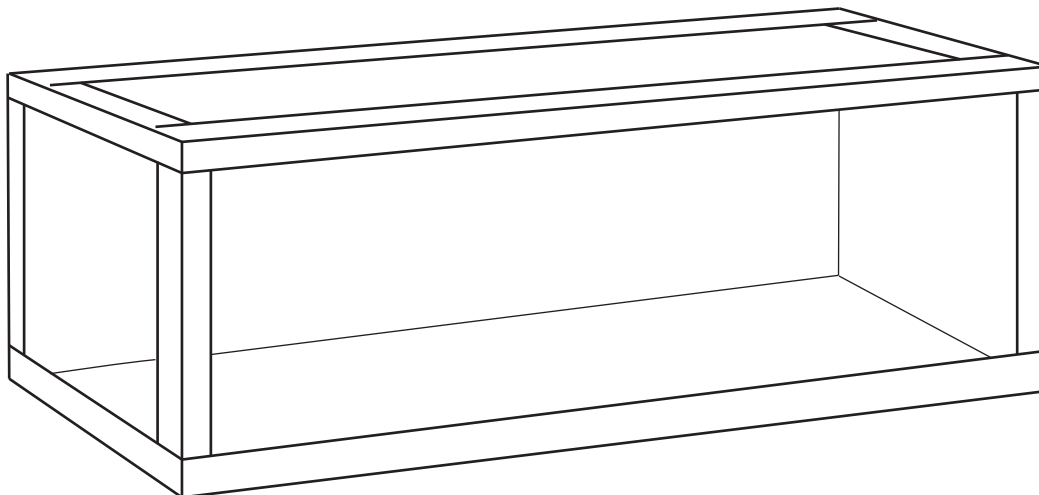

MEASURING TAPE

SUGGESTED HARDWARE

We recommend removing one side of your yurt crate and lining the inside of the crate with a raised garden bed liner. Additional wood inside the crate may help evaluate your garden bed. This DIY project can be done with the main crate or ring/dome crate for a smaller garden.

RING/DOME CRATE
